CALFED Bay-Delta Program

Re: CAL-FED Framework for Action

Dear Mr. Ritchie:

We are dismayed to learn that CAL-FED has decided to finalize its plan regarding the Framework for Action project without holding public meetings to explain how your plans have changed and what effect the plan will have on the citizens of the State of California.

As a member/supporter of the Merced River LandOwners' Group, I have been concerned with the apparent lack of understanding with which CAL-FED has proceeded in this entire endeavor. Agriculture is the backbone of the California economy but we cannot provide habitat or feed people without reliable and affordable water. Where is your plan for adequate water storage to meet the needs of the urban *and* rural communities? Agriculture cannot survive if the response to a drought is to take water from the farmers to support other facets of the State economy.

We urge you to postpone any final action until comprehensive public meetings are complete. We need a comprehensive, cogent water plan which reflects the diverse elements of the California economy; a balanced plan is the only plan which will work on a long-term basis.

Sincerely,
